Web Developer based in Southampton, UK, holding an approved working visa and actively seeking opportunities in dynamic environments.

With a background on Sports Science and Training, I started my career as part of the coaching team at Benfica futsal team, where I quickly learned to working under pressure and fostering a deliver-and-win mindset.

Inspired by a passion for technology, I embarked on a learning journey in computer sciences and coding since 2020, ultimately evolving into a web development teacher in an elementary school.

Eager to bring this diverse journey and innovative mindset to contribute to your team, adding a unique perspective to the tech landscape.

Keen to show you how driven I am!
